

Brayden M Sherrod

A quick learner, critical thinker, problem solver and determined worker.

WORK EXPERIENCE

H-E-B Curbside, Austin Tx — Personal Shopper/ Curbie

June 2021– August 2021

Enabled me to understand how to work well under pressure with specific deadlines as well as communicate well within a team setting. I learned how to manage and prioritize multiple orders at once on a day to day basis. I grew in my ability to adapt quickly to weekly changes within our system and procedures. I learned about the importance of customer service and how to resolve multiple types of possible conflicts with a fellow employee or customer.

EDUCATION

Texas A&M University, College Station Tx — *Currently Enrolled*

I am currently a Junior Computer Science Major in the College of Engineering with a 3.6 / 4.0 GPA. Last semester I completed two computer science courses, covering C++ and a basic understanding of programming languages as a whole. During these courses I learned about linked lists and recursion as well as many other programming topics. This spring semester I am enrolled in four of my major specific courses, covering computer organization from the ground up, data structures and algorithms, discrete structures for computing, and an in-depth study of Haskell and Java. I enjoy working on data science projects and using or creating algorithms for sorting, parsing, or displaying data in a variety of ways. I plan on graduating with a Bachelor's Degree in C.S. with a Minor in Business and continuing on for a Master's Degree in Business Management.

SKILLS

Knowledge: An understanding of the principles involved with computer programming as well as a knowledge of Python, C++, Java, Haskell.

ORGANIZATIONS

Grace Bible Church – Anderson: I am an active member of the college ministry here and a member of a weekly Bible Study.

Impact Retreat: This summer I will be leading a group of incoming freshmen through a weeklong camp alongside a team of other counselors and leaders in my camp. I will be attending weekly meetings all semester in preparation for camp this summer.

President of CPHS FCA: I led the local FCA at my high school. I conducted weekly member meetings as well as organized monthly events.

HOBBIES

I enjoy researching programming languages and developing new projects outside of class to enhance my learning.
